

# Mr. AVISHKA JAYAKODI

## Personal Details

Full name: Jayakodi Arachchilage Avishka Kavinda Jayakodi

Birthday: 2000 March 14

Home Town: Kurunegala

Email: [kavindaa805@gmail.com](mailto:kavindaa805@gmail.com)

Mobile: 077 6091074

## Personal Summary

I am a Computer Science and Statistics undergraduate at the University of Sri Jayawardenepura with hands-on experience in MERN stack development. I enjoy building responsive web applications, working with databases, and creating user-friendly interfaces. I have a strong interest in web technologies, artificial intelligence, and data-driven solutions. I am always learning and improving my skills to build reliable and useful software products.

## Technical Skills

**Programming Languages:** Java, JavaScript, Python

**Frontend Development:** HTML, CSS, React.js, Tailwind CSS, Bootstrap

**Backend Development:** Node.js, Express.js, REST API Development

**Databases:** MongoDB, MySQL

**AI / Machine Learning:** NumPy, Pandas, Scikit-learn, Machine Learning and AI Basics

**Tools & Platforms:** Git, GitHub, VS Code, Postman / Thunder Client, Jupyter Notebook

## Education

- Faculty of Applied Science, University of Sri Jayawardenepura (undergraduate)  
Subject Combination: Computer Science, Statistics, Mathematics
- SLIPD Academy, Advance Python course.

## Certification

- PyData Sri Lanka workshop series conducted by PyData Sri Lanka, at the University of Sri jayawardenepura.  
[certificate link](#)
- Advance Python Course, Machine learning an AI  
[certificate link](#)

## Projects

### 1. Sentiment Analysis Web Application

Developed a machine learning-based web application to predict whether product feedback is positive or negative. Built the model using Python, Pandas, NumPy, Scikit-learn, and Naive Bayes, and connected it with a simple Flask web application to display positive and negative review counts.

Git Hub: [Avi-jay/Sentiment\\_Analysis\\_Project: Sentiment\\_Analysis\\_Project](#)

### 2. Smart POS System

Designed and developed a MERN stack Point of Sale system for supermarket operations. The system includes product management, cart handling, discount calculation, checkout, sales reports, dashboard charts, and role-based access for admins and cashiers.

Git Hub: [Avi-jay/smartmart-pos-system](#)

### 3. MERN Authentication System

Built a secure MERN stack authentication system with user registration, login, JWT authentication, protected routes, form validation, and role-based access for admin and customer users.

Git Hub: [Avi-jay/mern-auth-app: MERN authentication App](#)

### 4. Care Alert – Hospital Queue Management System (Group project)

Built a real-time hospital queue management system using React, Firebase, Arduino ESP32, and a wearable IoT device. The system helps hospital staff monitor patient alerts and queue updates through a cloud-based web platform. [Linkedin](#)

## Soft Skills

Problem Solving, Team Collaboration, Communication, Time Management, Adaptability, Critical Thinking, Attention to Detail, and Self-Learning.

## Languages

- Sinhala
- English
